

COLOR FOUNTAIN 48

General Description:

WDM's ColorFountain 48 is the perfect addition to any pond, lake, or water application in need of rejuvenation. This floating fountain consists of a 48 RGB LED light ring, 600 PGH UL water pump, and built-in transformer. Adjustable jet sprays at various heights over 40" and LED lights provide super-bright color-changing effects. No installation required; simply "plug and play" and relocate when needed for your next event or party.
