

COLORWATER 36

General Description:

The Colorwater 36 offers super-bright LEDs and can be used for both indoor and outdoor applications. This RGB underwater light offers the best of both worlds with solid color as well as color changing effects to add even more to your landscape or pond applications.

Illuminate your water feature more beautifully than you've ever dreamed possible with underwater lighting. Our Colorwater 36 LED Fixtures cast brilliant, bright light onto your waterfalls, streams, plants, landscapes, and more.

Put light in places you never before thought possible. Shallow stream beds, up lit marginal plants, beautifully illuminated water lilies... all made possible with Colorwater 36 designed specifically for ponds and water features.
