

5 WATT LED BULB

General Description:

A nice transition to LED

The transition to "green" cannot be easier than with the WDM 5W LED bulb. An impressive 300 lumens is generated by merely 5 watts of consumption. Available in 5000K and 6000K color temperatures, this lamp is constructed of solid aluminum housing and an retro-fitting E-27 base. The life is 50,000 hours and ideal for simple illumination applications.

Specification:

Light Source: High Power Cree LEDs

Light Color: White 5000K

Brightness: 300lm, 350 lux (at distance of 1m)

Color Temperature: 5000K

Beam Angle: 120 degrees

Life Span: 50,000 hours

Power Consumption: 6.5W

Voltage: AC 100-240V

Number of LEDs: 5 LEDs

Dimensions (Metric Units): 60mm x 104mm

Cover Material: PC

Housing: Aluminum

Protection Rating: IP64

Operating Temperature: -20°C to - 40°C
